

"It was fun and I learned a lot"

From [Dmytro Tovstokoryi](#) at [Mintlify](#):

I recently joined Mintlify as a part-time design engineer. [...] I started a daily thread sharing UI fixes and improvements that I was shipping. I also invited people to share any UI bugs they noticed.

People responded. I fixed things in near real-time. It was fun and I learned a lot.

I enjoy little posts with updates like this.

(However, a small thing: I wouldn't use text-shadow this way. It's veering into the territory of faux bolding, and looks bad. And, in this case, it feels like it's not solving a problem.)
